Easy Stuff That Works

So what is it all about?

If you have a small business you might feel that a sophisticated software package is more than you need. Well firstly, you can get inexpensive but cut down versions of software packages like Sage or Quickbooks and that is always worth considering. (In which case let us know.) But

you may also like to consider using a spreadsheet based system.

And that is where our own spreadsheet package – *Easy Stuff That Works* – may be appropriate. This package is provided free of charge to our clients and provides an excellent way of dealing with bookkeeping for smaller businesses.

Don't Panic ...

... this is actually easier to use than it looks!

In essence this is sophisticated list making - it is a template to enable simple computerised bookkeeping on a spreadsheet. It deals with bookkeeping and VAT accounting but is no substitute for a bookkeeping software package. But its your for **free** if you contact us!
